

Jimmie Ulenius

/ Senior Software Engineer

Jimmie is a highly motivated and hardworking individual who is dedicated to work with cloud solutions. He has worked with Microsoft Azure and C# for several years and he considers it both his passion and his profession.

/ Highlighted assignments

Lead Engineer / Architect

Region Skåne

Jan 2026 - Ongoing

Currently leading the AIS team, I architect and develop maintainable integration solutions in .NET C# and Azure. I serve as the technical authority on the project, actively reviewing and validating deliverables from external consultancies to ensure they meet our internal architectural standards and remain easily maintainable by our team. I am also driving ongoing R&D efforts, including an active POC using Microsoft Fabric (Link to Fabric in Dynamics 365) to consume SQL Endpoints within AIS.

Senior Software Engineer

E.ON

Aug 2024 - Dec 2025

As a senior .NET and Azure developer, I am working in the Nordic Integration Platform (NIP) team in a project which goal is to replace integrations for file transfers using SAP with new ones implemented in .NET 4 (C#) and Azure.

Techniques

.NET
C#
Azure
Microservices
ALM
CI/CD
Azure DevOps
Terraform
SQL
IaC
Bicep
JavaScript
Design patterns
GitOps

Region Skåne

Lead Engineer / Architect

Jan 2026 - Ongoing

Working as Lead Developer/Senior Integration Developer.

Currently leading the AIS team, I architect and develop maintainable integration solutions in .NET C# and Azure. I serve as the technical authority on the project, actively reviewing and validating deliverables from external consultancies to ensure they meet our internal architectural standards and remain easily maintainable by our team. I am also driving ongoing R&D efforts, including an active POC using Microsoft Fabric (Link to Fabric in Dynamics 365) to consume SQL Endpoints within AIS.

NET C#, Azure Integration Services (AIS), VNet, Key Vault, Storage Accounts, Infrastructure as Code (Bicep), DevOps & CI/CD (Azure DevOps), Managing source control, work items, and automated pipelines for both software and infrastructure, Enforcing semantic versioning, secure integration deployments, and rigorous peer code reviews

E.ON

Senior Software Engineer

Aug 2024 - Dec 2025

As a senior .NET and Azure developer, Jimmie was working in the Nordic Integration Platform (NIP) team in a project which goal is to replace integrations for file transfers using SAP with new ones implemented in .NET 4 (C#) and Azure. This is a green field project where his responsibilities were also to setup Repositories for software and infrastructure are templated to be reused by other projects in E.ON.

Software design and architecture, Infrastructure in Azure, Kubernetes, Key Vault, Container Registry, VNet, Storage Account, Bastion, Terraform, GitOps Pipeline for software, Building and publishing NuGet packages, Semantic versioning, Building and publishing Docker Images, Continuous integration and deployment, Code reviews, Pipeline for infrastructure

Visma Drafit AB

Senior Backend Engineer

Aug 2017 - Aug 2024

Having the role as a backend developer using C# with great focus in Azure. The company focuses on replacing legacy systems based on EpiServer with new ones written in .NET and Azure. This has resulted in that I have been working as Azure DevOps engineer focusing on Infrastructure as Code (IaC) using Bicep, ARM templates, PowerShell and GitHub Actions and now is the go-to-person about things in Azure and main contributor for IaC. For our IaC I also created a naming convention that is implemented in both Bicep and PowerShell which ensures that we have consistent naming for resources in Azure.

.NET, Mongo Atlas, React, Azure (App Service, Container App, Function App, Storage, Service Bus, Static Website, API Management, Key Vault, CDN, Redis Cache, Application Insights and more), Agile, CI/CD Pipelines.

Fordonsdata Nordic AB

Software Developer

2011 - 2017

As a system developer, I have the following responsibilities:

Requirements, Development, Testing, Deployment

Primarily focusing on sales system for car retailers. This system is built in WPF, MVVM, Entity Framework, SQL Server, WCF, and Web API. My role in this project, besides as a regular developer, is to architect and innovate frameworks, conventions, controls etc. This is done with my coworkers or on my own to then be spread to the other developers. Another project I have been involved in is a web app to book car service. This app is made in ASP.NET, jQuery, Entity Framework, and SQL Server. On my initiative, our department is using Team Foundation Server (TFS) for application life management which has improved the development process. I have also set up a build environment in TFS to simplify internal deployment for testing. The development is driven in an agile fashion inspired by Scrum and Kanban.

ASP.NET, WPF, MVVM, Entity Framework, SQL Server, WCF, Team Foundation Server, Scrum, Kanban

Kjell & Company

Software Engineer

2007 - 2011

Primarily working with business logic and systems in Dynamics NAV and the website which was written in ASP.NET. I had the following responsibilities:

Requirements, Development, Testing, Deployment, Buffer stock system, Stock picking system, Store stock inventory system, Search engine in website, Card payment integration in website, WCF service to keep track of each store stock level, Data export in XML to enable integration between Dynamics NAV and inventory system, product information management system and new website

ASP.NET, Dynamics NAV, XML

/ Past employments

Knowit FLX	Jan 2027 - Forward
Crowdcollective	Aug 2025 - Dec 2026
Wise IT	Aug 2024 - Aug 2025
Visma Draftit AB	Aug 2017 - Aug 2024
Fordonsdata Nordic AB	2011 - 2017
Kjell & Company	2007 - 2011

/ Education

Certified Programmer KY Ekbackeskolan Osby	2005 - 2007
--	-------------

/ Courses & Certifications (Some of them)

Microsoft Azure Fundamentals	2022
Professional Scrum Master	2016
Certified Software Architect – Microsoft Platform	2016
70-511: Windows Application Developmentwith Microsoft .NET Framework Microsoft Certified Technology Specialist	2013
70-526: Microsoft .NET Framework 2.0 - Windows-based Client Development Microsoft Certified Technology Specialist	2007

/ Language skills

Swedish	Native or bilingual proficiency
English	Full professional proficiency
