

Robert Holst

/ Solution architect

I have a broad background in web development and have worked as a full-stack developer, dev lead, solution architect, and tech lead. I have the ability to quickly understand complex systems and processes, see the bigger picture, and identify how they can be improved.

As a Solution Architect, I thrive at the intersection of technology and business, combining technical depth with strategic thinking. I'm driven by creating sustainable and intuitive solutions that deliver long-term value, and by collaborating with teams to build structure, quality, and simplicity in both architecture and execution.

I'm motivated by environments where innovation, collaboration, and user experience are at the core.

/ Highlighted assignments

Solution Architect

IKEA

Aug 2024 - Feb 2026

Modernizing the data model for the planning tool and building a service for real-time collaboration and storage.

Solution Architect

Jan 2020 - Nov 2021

Solution architect for a comprehensive project aimed at modernizing one of IKEA's largest planning tools. Worked in a team of architects developing solutions and integrations.

/ Highlighted education

Web Development

Blekinge Tekniska Högskola

2002 - 2005

Roles

Solution Architect
Lead Developer

Methods & Processes

DevOps
Agile Methods
CI/CD

Platforms

Amazon Web Services
Microsoft Azure

Tools

Terraform

/ Relevant projects and assignments

ADB Safegate

Principal Machine Learning Engineer

Apr 2026 - Ongoing

Acts as an advisory ML Engineer for an aviation safety initiative, collaborating with peers to architect and optimize LiDAR point cloud processing workflows. Provided technical steering on 3D spatial data handling and machine learning pipelines specifically tailored for accurate, safety-critical apron clearance and aircraft detection.

IKEA Marketing and Communication

Solution Architect

Feb 2024 - Ongoing

As a Solution Architect for two teams that specialize in digital scenes and virtual products, I enable the modernization of IKEA's 3D asset creation pipelines. Driving the designing of scalable workflows using industry standards like USD and MaterialX, and streamlining the infrastructure behind how IKEA 3D models are built, stored, and rendered.

IKEA

Solution Architect

Aug 2024 - Feb 2026

Modernized planner data models planner tools and built services for real time collaboration and storage.

Integration, Solution Architect, Git, Microsoft Azure, GitHub, Terraform

ADB Safegate

AI/ML Specialist

Sept 2025 - Nov 2025

Stepped into a late-stage LiDAR object detection project to secure the machine learning implementation. Engineered preprocessing pipelines for complex 3D point cloud data and successfully trained a classification model for both system testing and real-world inference.

Machine Learning algorithms, Python, Principal Engineer

IKEA

Lead Technical Architect

Nov 2021 - Aug 2024

During my assignment as lead technical architect for one of IKEA's largest planning tools, I led a team of architects and had overall technical responsibility for the solution and its integrations. I coordinated the work between 3–5 development teams and supported product owners in their priorities, which enabled us to develop a globally scalable solution.

Leadership & Management, Solution Architect, Amazon Web Services, Serverless, Cyber Security, China Cyber Security law

Solution Architect

Jan 2020 - Nov 2021

Solution architect for a comprehensive project aimed at modernizing one of IKEA's largest planning tools. Collaborated within a team of architects to develop solutions and integrations.

Solution Architect, Amazon Web Services, CI/CD, Elasticsearch, Grafdatabaser, Serverless, Data Modeling, System integrations

Lead Developer

Oct 2017 - Jan 2020

During my time as a developer lead for a small team, I was responsible for planning, leading, and following up on development work, which included systems for managing custom-made countertops and sales APIs. I ensured that the team had the right conditions to deliver effective solutions while maintaining high code quality and good collaboration within the group.

Agile Methods, Amazon Web Services, Node.js, API, Lead Developer

Aller Media AB

Software engineer and devops

Jan 2016 - Sept 2017

During my time at Aller Media AB, I worked as a DevOps and actively participated in their digital transformation. I was responsible for migrating their web platform from a traditional server hall to a cloud-based environment, which involved both technical changes and improved processes for faster and more reliable deliveries. I also worked on streamlining their publishing tools.

/ Past employments

Aller Media AB

Jan 2016 - Sept 2017

Lexicon IT

Dec 2014 - Dec 2015

TicTac Interactive AB

Aug 2006 - Nov 2014

/ Education

Web Development (BSc)

2002 - 2005

Blekinge Tekniska Högskola

/ Key competencies

Level 5 - Expert

Amazon Web Services, API, CI/CD, DevOps, Git, GitHub, Lead Developer, Node.js, Serverless, Solution Architect

Level 4 - Advanced

Agile Methods, China Cyber Security law, Cyber Security, Data Modeling, Integration, Leadership & Management, Microsoft Azure, NoSQL, Principal Engineer, Python, Software engineer, System integrations, TypeScript

Level 3 - High Competence

Elasticsearch, Machine Learning algorithms, PHP, Terraform, WordPress

Level 2 - Intermediate

Grafdatabaser

/ Language skills

Swedish

Native or bilingual proficiency

English

Full professional proficiency
