

Imran Zunzani

/ Senior Software Engineer/DevOps/Cloud Architect

Senior Cloud & Software Engineer with 15+ years of experience designing, developing and operating enterprise applications and microservices. Strong hands-on development background in Java/Spring Boot, Golang and SQL with extensive experience building APIs, backend services, integration solutions and automation tooling. Combines software engineering expertise with cloud architecture, Kubernetes, DevOps and platform engineering across AWS, GCP and Azure.

/ Highlighted assignments

Senior Software Engineer - Cloud Architect

Ingka (Ikea Digital)

Nov 2021 - Apr 2024

Cloud Architect and platform engineer within Ingka's Foundational Engineering Services team. Developed cloud automation, self-service capabilities and CI/CD solutions on GCP (GKE) and AliCloud using Terraform and GitHub Actions. Focused on security, performance, stability and developer experience for product teams across Europe, the US and China.

Senior Software Engineer /Architect

Client - Ikano Bank

Nov 2020 - Oct 2021

Senior Software Engineer in the New Lending Platform squad, responsible for developing, refactoring and securing Java Spring Boot microservices running on AWS EKS. The platform acts as a critical integration layer between the IKEA Finance App and Nets Payment Services. Worked with backend development, API integrations, security enhancements, performance optimisation and much more.

Techniques

Java
Architecture development
Oracle SQL
PL/SQL
JavaScript
Golang-programmering

Tools

Java Spring
Elasticsearch / Kibana
Git
Microservices architecture
Spring Boot
JIRA

Platforms

Kubernetes
GCP
Amazon Web Services
Microsoft Azure Cloud Services
GitHub Actions
GitHub

Products

Terraform (HashiCorp)
Docker
Google Kubernetes Engine
Oracle PL/SQL
GitHub Copilot

/ Relevant projects and assignments

IKEA (Inter)

Senior Software Engineer

Jan 2026 - Ongoing

To establish a standardized, automated, and secure process for managing database schema changes across Oracle, PostgreSQL, and MongoDB using Liquibase integrated with GitHub Actions.

To migrate products from Red Hat OpenShift to Google GDC (Orbit - Ingka); with development of deployment pipelines to enable parallel deployments to both platforms and coordinated phased cutovers with product teams, including sanity checks and risk mitigation.

Solution Architect, Oracle SQL, Migrations, Microsoft Azure Cloud Services, Shell programming, Kubernetes, Google Cloud Platform (GCP), PostgreSQL, containerized workloads, GitHub Actions, Liquibase, GitHub Copilot, OpenShift Container Platform, Platform Engineer, Networks Security, database devops

IKEA (Inter)

Senior Software Engineer

Mar 2025 - Dec 2025

The "Basics in Place" initiative assesses product teams' DevOps maturity. I lead Solution Architecture and Database DevOps (DataOps) consulting, advising teams on targeted improvements. The process uses arc42, Liquibase, and GitHub Actions, and supports deployments to both Azure and on-premises environments.

Microsoft Azure Cloud Services, PostgreSQL, GitHub Actions, Liquibase, Arc42

IKEA (Ingka)

Senior Software Engineer

Jun 2024 - Feb 2025

To evaluate and report Developer Experience counterparts for tenants migrating from OpenShift to Google Anthos (onPrem) covering Tekton Pipelines, Container Registry, GitHub Actions and JFrog Artifactory. Initial set up of IaC on Hashicorp's Terraform Cloud (SaaS) for Anthos leveraging Workload Identity.

Infrastructure as code (IAC), OpenShift, GitHub Actions, Anthos, OpenShift Container Platform, Hashicorp Terraform Cloud Engineer

Ingka (Ikea Digital)

Senior Software Engineer - Cloud Architect

Nov 2021 - Apr 2024

Worked within the Foundational Engineering Services team, developing cloud platform capabilities and automation solutions on GCP (GKE) and AliCloud using Terraform, Golang and GitHub Actions. Contributed to self-service platform components, CI/CD tooling and cloud automation used by product teams across Europe, the US and China. Responsibilities included hands-on development, platform engineering, troubleshooting and optimisation with a focus on security, performance, stability and developer experience.

GitHub, JFrog Artifactory, HashiCorp Vault, Google Kubernetes Engine, GCP, GitHub Actions, Golang programming language, JFrog Xray, Frogbot, Golang Development

Client - Ikano Bank

Architect - Microservices

Nov 2020 - Oct 2021

Worked as an IT Architect and hands-on engineer in the New Lending Platform squad, developing and improving Java Spring Boot microservices running on AWS EKS. The platform serves as the integration layer between the IKEA Finance App (UK market) and Nets Payment Services. Responsibilities included development, refactoring and optimisation of microservices, implementation of security-related requirements, API integrations, performance improvements, troubleshooting and collaboration with development teams throughout the software delivery lifecycle.

Java Spring, Amazon Web Services, Nexus, Apache Kafka, containerized workloads, Amazon EKS, OpenAPI / Swagger

Client - Generali Switzerland

Google Cloud Architect

Jul 2019 - Nov 2020

As part of a team of Architects, the assignment was to devise a Solution to house Container Workloads on Google Kubernetes Engine on Google Cloud Platform along with the connection provisions to the legacy datacenter. The Solution employed Infrastructure as Code utilizing Terraform and GitLab. We aimed at achieving provisions for Security and Compliance early and inherent in the designs.

Git, JIRA, Infrastructure as code (IAC), Apache Kafka, containerized workloads, Cloud Security Architecture, Atlassian Confluence, Terraform (HashiCorp), Google Kubernetes Engine, Google Cloud Architect, Platform

Engineer, Qlik Replicate

Client - Generali Switzerland

DevOps Engineer

May 2018 - Jul 2019

Building and managing various DevOps provisions and pipelines for CoPa (Communications Platform), a private cloud setup on RedHat's OpenShift which houses Confluent - Kafka as the integration solution for legacy and new applications/systems.

Java Spring, Apache Kafka, containerized workloads, Microservices architecture, OpenShift, Platform Engineer

Client - Diligenta

Architect - IT Solutions

Feb 2017 - Apr 2018

Implementation of an in house CMDB and ITSM System while coordinating with various units like Servers team, Networks team etc., and managing team members developing the System. The new System is focused on bringing consistency and to save cost incurred by existing Systems of varied vendors.

ITSM, Cost optimisation, CMDB (Configuration Management Database)

Client - Diligenta

Architect - Technical

May 2014 - Jan 2017

Projects:

- Capacity Dashboard - To collect utilization of all Application Servers using self-healing Spring Batches and to generate monthly reports based on 95th Percentile based utilization results from the collected data.
- Demand Management Dashboard - To handle analyses of VMWare clusters in estate and to handle requests of demands for servers from projects, by allocating servers in proper cluster.
- Master Data Manager (MDM) - To consolidate data of insurance policies from legacy systems while taking care of building an efficient system taking care of DB and PL/SQL aspects utilizing Oracle for backend and Jasper Reports for frontend.

Achievements:

- Automated areas of reporting and compliance, saving time and efforts of fellow associates which can now be utilized in other analytical areas.
- MDM helped the timely decommission of legacy system saving the license cost as predicted.

Java Spring, PL/SQL, Spring Batch, Oracle PL/SQL

Client - Diligenta

Performance Engineer and Capacity Analyst

Jun 2014 - Dec 2014

- To analyse, troubleshoot and improve performance issues in various applications, Middleware and database systems for Diligenta.
- To engage and coordinate with various stakeholders and teams of enabler systems for analyses.
- To propose solutions keeping in view the business aspects. Thus offering trade offs/alternatives over a costly approach.
- Monthly analysis and reporting/meeting with client for capacity landscape covering all servers (virtual and physical) monitored by MasterCraft's APM, Network monitored by Solarwinds and Storage handled by Hitachi's software.
- To find highly utilized and under utilized components and to recommend required changes to assets like removing cores/blades from under utilized clusters and shift them to clusters that require more processing power in future.

SQL Query Optimization, PL/SQL, Oracle PL/SQL, Software performance engineering, Zabbix Monitoring, System Performance Improvement

Client - Diligenta

Architect - Java Spring Applications

Mar 2014 - May 2014

Architect and design the Spring framework related structure of the project for an in house replacement of a commercial Document Management System saving the licensing cost annually (in Millions of Pounds/GBP). The product had basic but highly efficient functionality of file storage and retrieval based on the algorithm used to maintain fast accessible folder structures.

Java Spring, Cost optimisation

Client - Friends Life UK

Onsite Coordinator

Apr 2013 - Mar 2014

Handled the following responsibilities for 'Auto Enrolment', a system developed to auto enroll employees of an organization in pension schemes:

- Manage project phases by coordinating the deployments with Build Management, Change Management and CAB.
- Brainstorm and understand requirements with BAs.
- Design solution, assign changes to develop to developers.
- Provide guidance to developers helping them out with logic.

SQL/DB2, Release Management, Spring Boot

Client - Friends Life UK

Senior Java Developer

Jul 2012 - Mar 2013

Handled the following responsibilities for 'Auto Enrolment', a system to to auto enroll employees of organizations in pension schemes, based on new Pensions Reforms introduced by UK's legislation :

- Document, design and develop code for new requirements and enhancements.
- Guiding and helping junior associates about framework and various logic.
- Performance and Security optimization of the web application.
- Improving response/execution times of Spring batch jobs.
- Review, revise data model and other sections of database like table indexes to improve performance.

SQL/DB2, Java Spring, Application Security

Client - BSNL

Team Lead - Roll Outs and Client Liaisons

Jan 2012 - Jun 2012

Responsibilities:

- To lead .the whole team drafted for a roll out, at an SSA.
- To interact with the TDM, TDE and lead coordinators of the SSA, to plan and arrange the Control Room for operations.
- To plan and arrange trainings, meetings and conferences about modules and identified issues.
- To coordinate with members of application development team and migration team.

Release Coordination, Digital Rollouts & Operational Support

Client - Indian Ministry of Finance

Software Development Engineer

Jan 2011 - Dec 2011

To develop (understand requirements, code and test) new requirements and enhancements for the Accounts Module for Integrated Financial Management System (IFMS).

MySQL, Java Spring, MSSQL Server

Client - BSNL

Team Member - Roll Outs and Client Liaisons

Nov 2009 - Dec 2010

Responsibilities:

Covering the SSAs in the states of Maharashtra, Gujarat and Madhya Pradesh:

- To analyze client satisfaction rate by visiting and providing support to SSAs during roll outs.
- To monitor, analyze and provide resolution for go-live issues.
- To provide functional training to client's workforce for various applications of call detail records.

Release Coordination, Training Management

/ Past employments

Knowit AB

Nov 2021 - Ongoing

Tata Consultancy Services, India

Nov 2009 - Nov 2021

/ Education

CAS - Cyber Security (Certificate of Advanced Studies) ETH Zurich	2019 - 2020
B.E. in Information Technology (Bachelor of Engineering) Rajiv Gandhi Prodyogiki Vishwavidyalaya	2006 - 2009
Diploma in Information Technology (Diploma) Rajiv Gandhi Prodyogiki Vishwavidyalaya	2003 - 2006

/ Courses & Certifications

HashiCorp Certified: Terraform Associate (003) HashiCorp	2024
HashiCorp Certified: Terraform Associate 2024 Udemy	2024
Google Cloud Certified Professional Cloud Architect Google Cloud	2019
Various Google Cloud Courses on Coursera Coursera	2019
Oracle Certified Professional, Java EE 5 Web Component Developer Oracle	2011
Sun Certified Java Programmer, SCJP 5 Sun Microsystems	2009

/ Language skills

Hindi	Native or bilingual proficiency
English	Native or bilingual proficiency
Swedish	Elementary proficiency
