

Mikael Fransson

/ Senior Software Engineer
Cloud -& Devops Expert

Mikael has worked as a consultant and consultant team leader for many years and has an extensive experience in bringing great and sensible solutions to life. As a true generalist, Mikael feels at home working with both new and old IT-technology of all kinds and sizes.

Focus areas are cloud adoption, utilizing DevOps methods to empower teams and making sure projects deliver. Architecting cloud solutions, running operations and monitoring while utilizing the strength of the cloud to help development teams run a smooth ship are all parts of regular assignments.

/ Highlighted assignments

Cloud Architect and Team Lead

Ericsson

May 2020 - Jan 2021

Team Lead and Cloud Architect in a project aimed at migrating most of the Ericsson services to the Public Cloud. Work features planning, collaboration and hands on implementation of a secure, robust and practical framework that must work within a hybrid cloud solution featuring both AWS, GCP and Azure.

/ Highlighted education

Media & Computer Science

2003 - 2006

Program

Linnaeus University

Computer Engineering (Dataingenjörsprogrammet)

1995 - 1998

College Of Växjö

Platforms

AWS
GitHub
Kubernetes
Linux
Microsoft Azure

Products

CloudFormation
Docker
Jenkins
MongoDB
Nginx

Techniques

Cloud Architecture
Python
SQL
Ansible
Hybrid Cloud
Apache
Network Security

Methods & Processes

Agile
Automation
CI/CD
DevOps
Testing

Tools

Inter IKEA AB

Delivery Lead

Dec 2025 - Jun 2026

As Delivery Lead, responsible for team leadership, delivery and internal collaboration. Oversees Azure infrastructure, IaC, GitHub workflows, CI/CD pipelines and integrations for Inter IKEA's global e-commerce. Works with product teams to ensure reliable delivery of critical platform components and a resilient e-commerce ecosystem.

Life Cycle Management, Git, CI/CD, Docker, DevOps, Atlassian Jira, Infrastructure as Code, Cloudflare, Azure Infrastructure, Security DevOps, Cybersecurity for architecture, Bicep

Nomondays AB

Lead Designer

Aug 2021 - Mar 2024

Nomondays is a Board - and Adventure games company created to bring excitement into everyday life.

Business Development, Design, User experience, Event management, Sales, Game development

Ericsson

AWS Architect and Team Lead

May 2020 - Jan 2021

Team Lead and Cloud Architect in a project aimed at migrating most of the Ericsson services (300+) to the Public Cloud. Three Public Cloud vendors are used, Azure, GCP and AWS. Work features planning, collaboration and hands on implementation of a secure, robust and practical framework that must work within a hybrid cloud solution featuring both AWS, GCP and Azure. The team has full responsibility for the AWS solution and the onboarding setup for this.

Security, Git, AWS, Microsoft Azure, DevOps, Network Security, CloudFormation, Python, Terraform, Hybrid Cloud, Public Cloud, ECN

IKEA

DevOps Engineer

Mar 2020 - Apr 2020

I did a short tour at the MHS/CPS team at IKEA Helsingborg. As I was moved to another assignment shortly after starting I managed to assess their current setup and come with some good advice regarding improvements and possible heading.

Apache Kafka, DevOps, Docker, GitHub Enterprise, Google Cloud Platform/GCP, OpenShift

Docker, DevOps, Apache Kafka, GitHub Enterprise, Google Cloud Platform, OpenShift

Mercedes Benz & Mercedes Benz Finance

Automation Expert

May 2019 - Oct 2019

As a part of the AM team, help to develop and maintain automation mindset. Structure and educate around DevOps methods and ways of working. Implement ChatOps for both AM team and internal clients. Architecture based on a Puppet based Docker swarm setup, version controlled on a private GitHub enterprise. Automated functions implemented using a secured Jenkins - Mattermost integration using a modified chatbot based on Hubot.

Atlassian Confluence, CI/CD, Docker, Docker Swarm, GitHub, Kubernetes, Puppet, Red Hat OpenShift Container Platform, Vault (Hashicorp)

Jenkins, CI/CD, GitHub, Docker, DevOps, Architecture, Puppet, Automation, Red Hat OpenShift, Kubernetes, Docker Swarm, GitHub Enterprise, Chatbot, Atlassian Confluence, HashiCorp, Finance

Baxter

Tools Tech Lead

Sept 2017 - Apr 2019

Support and evolve build systems and toolchains, including developer linux clients. Develop and maintain instrumentation related to build systems. Validate and sustain current validation of IT systems. Maintain and evolve server orchestration tools and orchestration configurations. Extensive documentation activities for validating environments and tools according to medical GxP standards.

Agile SW Development, Atlassian Jira, CI/CD, Coverity, Git/Gerrit, Jenkins, Python, Tools

Linux, Agile, Jenkins, Git, CI/CD, Gerrit, GxP, Atlassian Jira, Python, Instrumentation

IKEA IT

System Team CI/CD & Cloud Specialist

Feb 2017 - Aug 2017

Hands on implementation of AWS landing zones and migration procedures for diverse on-premises and alternative hosting environments with varied workloads. Designed and implemented the change management process for a new AWS-based CI/CD pipeline and managed its rollout. Collaborated with cross-functional teams to migrate workloads to AWS and ensure smooth operational handover.

Infrastructure, Cloud, AWS, CI/CD, Change process

Baxter

CM and Tools Technician

May 2016 - Feb 2017

Support and evolve build systems and toolchains, including developer clients. Develop and maintain instrumentation related to build systems. Validate and sustain current validation of IT systems. Maintain and evolve server orchestration tools and orchestration configurations.

Ansible, Artifactory, Atlassian Jira, CI/CD, Embedded Systems, Jenkins, Linux, Static code analysis

Embedded Systems, Linux, Jenkins, CI/CD, Atlassian Jira, Artifactory, Static code analysis, Instrumentation, Ansible

Sony Mobile
