Senior Software Engineer

Ikea

Apr 2022 - Ongoing

Senior Software Engineer for Inter IKEA profile pages. Delivered a React single-page application in 18 markets with a Node.js backend, using feature toggles to support diverse market requirements while keeping the codebase streamlined. Owned cross-cutting responsibilities across system design, frontend (accessibility and UX), backend, and CI/CD.

Senior Software Engineer

IKEA

Sept 2019 - Apr 2020

Senior Software Engineer for a "my pages" web site for IKEA Singapore where the end customer can access purchase history, digital receipts, customer loyalty credits etc. Developing features in Typescript in and C# on the Microsoft Azure cloud platform. Aside from the usual role of developer I also had lead responsibility for making sure the website was accessible.

Ikea

Developer, architect

Apr 2022 - Ongoing

Served as both developer and architect for Inter IKEA profile pages. Delivered a React single-page application in 18 markets with a Node.js backend, using feature toggles to support diverse market requirements while keeping the codebase streamlined. Owned cross-cutting responsibilities across system design, frontend (accessibility and UX), backend, and CI/CD.

C#, Microsoft Azure, Architect, TypeScript, React

JE68

Fullstack, Though Mostly Front End

Apr 2022 - Aug 2022

New commerce site for JE68, wrote the email templates, and worked on the main site. The e-commerce site is built on the Optimizely platform. The frontend is designed as a react-application using a headless API towards the platform. This website was the first one in Sweden to sell motorcycles online.

C#, Microsoft Azure, TypeScript, React, Optimizely Commerce

Immunovia

Fullstack Developer

Jun 2020 - Apr 2022

Front- and backend-developer for a medical company, wrote aws-lambdas in python, database migration scripts, and made a graphic component for manually gridding and accepting some diagnostic results.

AWS, TypeScript, Angular, Python

IKEA

Developer, Accessibility "Master"

Sept 2019 - Apr 2020

Front- and backend-developer for a "my pages" web site for IKEA Singapore where the end customer can access purchase history, digital receipts, customer loyalty credits etc. Developing features in Typescript in and C# on the Microsoft Azure cloud platform. Aside from the usual role of developer I also had lead responsibility for making sure the website was accessible.

C#, Microsoft Azure, TypeScript, React

Prisjakt

Designer, Android Development

Jun 2019 - Sept 2019

Worked on the price graph and designed and developed the upcoming physical shops tab and their map of shops. Also fixed minor bugs and managed some releases.

Java, Android Studio, Kotlin

KappAhl

Designer, Front- and Back-end Development

Jan 2019 - Jun 2019

Explored the possibilities of using a chatbot for a prominent clothing-retailer. This included research into human behavior towards chatbots, testing users, creating an Android client and a server to create a high-fi application that seems real to the user. This chatbot was integrated into the clothing-retailers application as a proof of concept.

REST, Android, Bitbucket, Gradle, Flask, Python, Kotlin, Google Dialogflow

Umeå Flygklubb (UFK)

Scrum Master, Front-end and Back-end Development

Jan 2018 - Jun 2018

Was the scrum-master for one of 7 groups that furthered the development of a legacy project designed to aid in the testing pilots theory-knowledge. The project had ~40 students with 14 branches on the repo so it was a real challenge to work together on something so big.

SQL, Java, CSS, GitHub, Bootstrap, React, JetBrains

Acino

Front-end Developer, Designer

May 2017 - Jun 2017

Procon was a dashboard program designed to run on some background screen and that will warn if values go out of range. This project was done over the summer and was a 5 year old legacy project that the company was polishing up for a new customer.

JavaScript, CSS, Git, Bitbucket, Angular 2

Sportswik

Auto-interviewer Front-end developer. Designer, User-tester

Jan 2017 - Jun 2017

Developed a prototype for an auto-interviewing system that players would be interviewed by. This involved several rounds of user-testing and 4 weeks of front-end development.

Technology: Html, Css, Javascript, Node, REST, Github

HTML, JavaScript, CSS, REST, Node, GitHub

Smaller Projects

Front End Development, Design

Jan 2017 - Jun 2017

Created a lot of smaller games, websites written in elm, small convenience scripts etc.

HTML, JavaScript, Java, CSS, C#, C, Unity, F#, Python, ELM

Hikikomori Umeå

Programming Lead, Design, Building Controllers

Jan 2016 - Jun 2017

Designed and developed a game for people with social anxiety. Built controllers and programmed 4 games.

Java, Phidget
