

Felix Alhbin

/ Senior Software Engineer

Senior software developer with extensive experience in .NET, Azure and business-critical systems in retail, e-commerce and CRM. Has worked as a backend developer, tech lead and chapter lead, focusing on integrations, APIs and reliable production systems. Uses AI as a core part of the development process through agentic workflows, and builds AI features with LLMs in personal projects.

/ Highlighted assignments

Senior Developer – Sales API

Inter IKEA | May 2026 – Present

Develops Sales API and a microservices-based backend for IKEA sales flows using .NET and Azure. Works with event sourcing, CQRS and DDD, and uses agentic AI workflows for planning, implementation and code review.

Senior Developer – My Pages

Inter IKEA | Nov 2022 – Aug 2025

Developed and maintained My Pages for 18 IKEA markets. Joined as the sole backend developer and remained as the team grew to nine people. The solution was built in .NET and MongoDB and ran in Azure.

Backend

C#, .NET, T-SQL

AI

Agentic AI workflows, GitHub Copilot, Claude Code, Codex, MCP, context engineering, LLM integration

Cloud and DevOps

Azure, Azure DevOps, Git

Frontend

TypeScript, JavaScript, Vue.js, HTML, CSS

CRM

Dynamics 365 CE, Power Platform

/ Relevant projects and assignments

Inter IKEA via Knowit, Malmö

Senior Developer — May 2026 – Present

Develops and maintains Sales API, a new Business API and a microservices-based backend supporting IKEA sales flows. The API handles customer interactions, shopping carts, products, services, delivery options, price calculations and order management across multiple sales channels. Works in .NET with event sourcing, CQRS and DDD, focusing on stable API contracts, testability, traceability and operations in Azure. Uses agentic AI workflows with custom agents for planning, implementation and code review.

C# · .NET · Azure · CQRS · Wolverine · Marten

Inter IKEA via Knowit, Malmö

Senior Developer — Nov 2022 – Aug 2025

Developed and maintained the “My Pages” web application for 18 IKEA markets worldwide. Joined as the sole backend developer and remained as the team grew to nine people. The technology stack was .NET and MongoDB, with everything running in Azure. Stayed with the team until taking nine months of parental leave.

CDON, Malmö

Chapter Lead and Senior Developer — Mar 2022 – Sep 2022

Worked in a team of five to develop and maintain the web application used by merchants on the CDON marketplace to manage their product listings. The work covered both frontend and backend development. As chapter lead, also had line management responsibility for a small team of developers.

C# · .NET · Azure · TypeScript · Vue.js · HTML · CSS · MS SQL · Git

Trygg-Hansa, Malmö

Dynamics 365 CE and Power Platform Developer — May 2021 – Mar 2022

Worked on migrating an in-house CRM system to a Dynamics 365 solution using the Sales and Service modules. Responsibilities ranged from form scripts and API development to Power Automate and plugins. Also contributed to migrating all environments to a new tenant.

C# · .NET · Dynamics 365 · Power Platform · JavaScript · HTML · CSS

Stratiteq, Malmö

Dynamics 365 CE and Power Platform Developer — Aug 2016 – May 2021

Developed solutions using Microsoft Dynamics 365 Customer Engagement and Power Platform across several client projects, covering both maintenance of existing solutions and new implementations. Served as architect and tech lead on the largest Dynamics 365 project. Proposed solutions and developed complex business processes and integrations with clients’ existing systems.

/ Other experience and personal projects

Malmö University, Malmö

Research Project Developer — Jun 2015 – Aug 2015

Developed a REST API in JavaScript and Node.js as a prototype for the Data Innovation Arena research project at Malmö University.

Node.js · PostgreSQL · Git

IKEA, Älmhult

Customer Support Representative, IKEA Hemma — Jun 2009 – Mar 2015

Provided customer support by phone and email. Handled complaints relating to kitchen products and managed home delivery bookings and changes by phone.

Vinsikt – Personal Hobby Project

Personal project | Sep 2026 – Present

Private, non-commercial web app for a small group of invited users, with no affiliation to Systembolaget, Vivino or Munskänkarna. Shows which wines are in stock at a selected store, displaying ratings from Vivino and Munskänkarna side by side. Uses Claude through the Anthropic API to read wine labels from photos, suggest wines to pair with a meal and propose rating matches for administrator approval, with a budget and daily limits on AI costs. Developed using agentic workflows in which custom agents and skills take a GitHub issue from design to a reviewed pull request, with hooks and CI providing quality checks. Includes over 2,000 automated tests and architectural decisions documented in ADRs.

TypeScript · React · Cloudflare Workers · D1 · Anthropic API · Claude Code
