

Fredrik Åkerberg

/ Senior Software Engineer

Fredrik is a passionate software developer who has worked in Microsoft and Google environments. His last years have been spent working close with the customer, with focus on backend development in a Microsoft environment, to solve their needs in the best way possible.

He has experience from the whole project lifecycle from setting up different projects from scratch with time estimation, framework evaluation, build configurations and automated test running. He also has experience from leading a team in different environments. Fredrik enjoys finding elegant and simple solutions to complex problems and strives to simplify solutions to cut down on maintenance costs.

Senior Software Engineer

Trygg-Hansa - Partnership Solutions

Dec 2024 - Dec 2025

Fredrik worked in Trygg-Hansa's Partnership team, developing and maintaining batch solutions, widgets, and APIs that enabled partners to sell insurance. His work focused on backend development with some DevOps responsibilities. He led the team's migration from the previous owner's servers to Tryg's infrastructure and collaborated with Partner Account Managers and Key Account Managers to balance partner and customer experience with technical maintainability. He also independently developed and maintained a replacement for an underperforming legacy file-based solution.

Senior Software Engineer/Systems Integration Manager

Wizkids A/S

Apr 2018 - Sep 2019

Following an integration meeting with a new customer, Fredrik's technical expertise and customer communication skills were recognised by the Head of Sales at Wizkids' Swedish office. He was subsequently given technical responsibility for all Swedish customers, addressing longstanding integration challenges. His responsibilities included customer onboarding and developing connections between Wizkids' synchronisation solution and customer systems. He also played a key role in shaping the development direction of the company's product suite and initiating a review of customer contract terms.

Trygg-Hansa - Sales and Partnership Integration

Senior Software Engineer

Dec 2024 – Dec 2025

Fredrik worked in Trygg-Hansa's newly formed Sales team, which brought together the former Sales and Partnership teams. The team specialised in home and contents insurance for houses and apartments, alongside boat and pet insurance. His initial responsibility was to contribute partnership knowledge and expertise, helping the combined team understand the needs of insurance partners and the solutions supporting their sales.

Trygg-Hansa - Partnership Solutions and Migration

Senior Software Engineer

Aug 2021 - Dec 2024

Fredrik worked in Trygg-Hansa's Partnership team, developing and maintaining batch solutions, widgets, and APIs that enabled partners to sell insurance. His work focused on backend development with some DevOps responsibilities. He led the team's migration from the previous owner's servers to Tryg's infrastructure and collaborated with Partner Account Managers and Key Account Managers to balance partner and customer experience with technical maintainability. He also independently developed and maintained a replacement for an underperforming legacy file-based solution.

Trygg-Hansa - .NET Development

Software Developer

Oct 2019 - Aug 2021

Fredrik worked as a .NET developer in Trygg-Hansa's Line of Business layer, developing both frontend and backend functionality. His role expanded to include mentoring junior developers, improving code quality, establishing development processes, and extending automated test suites to strengthen delivery quality. He also participated in a task force planning Trygg-Hansa's transition from TFVC to Git, helping ensure a smooth adoption across development teams.

Wizkids A/S

Software Engineer/Team Lead

Oct 2016 - Apr 2018

Fredrik worked as a Team Lead at Wizkids, helping the company move from ad hoc development towards a more structured way of working. His responsibilities included establishing development processes and evaluating how Zoho could support and improve the team's workflows.

C#, .NET Framework, SQL, GIT, HTML, jQuery, Zoho

Wizkids A/S

Software Developer

Dec 2015 - Oct 2016

Fredrik worked as a Software Developer at Wizkids, primarily handling support cases for the company's Sync Engine and Portal. He also took responsibility for several smaller development projects, implementing features requested by the company's largest customer.
