

Mikael Persson

/ Senior Software Engineer

Senior Software Engineer with a strong sense of ownership and a high focus on quality. A loyal and detail-oriented consultant who thrives in long-term engagements where he can build deep domain knowledge and create lasting value.

Has a strong interest and expertise in 3D products for the web, developing modern, user-friendly, and technically advanced web applications. Appreciated for his commitment, structured approach, and ability to take responsibility throughout the entire development process.

/ Highlighted assignments

Senior Software Engineer

INGKA / IKEA

Jan 2023 - May 2026

Worked within 3D as a Service at INGKA, maintaining and optimizing 3D models used across IKEA.com.

Key responsibility was Roter, a lightweight 3D viewer used on product and landing pages. It supported multiple formats, including modal experiences with product information and interactive features such as "complete the look" (upsell), dimension visualization, and AR for in-home product placement.

AI Developer

AI Innovation Factory

Jun 2026 - Ongoing

Built an internal AI assistant with Claude Code to help users pick filaments, troubleshoot prints, and suggest improvements. Gathered training data by scraping manufacturer specs and shop pricing. Implemented Skills, Hooks, and Context for reusable, standards-compliant code. Tested with oxlint (a11y) and Playwright. Final model runs CPU-only in Ollama on Cloudflare to cut costs.

AI Innovation Factory

AI Developer

Jun 2026 - Ongoing

Built an internal AI assistant with Claude Code that helps users pick the right filament, troubleshoot print issues, and get suggestions for better 3D prints. To gather training data, he built a site that scrapes manufacturer information and shop pricing. He also set up Skills, Hooks, and Context so Claude would write readable, reusable, standards-compliant code. For testing he used oxlint with a11y rules, plus Playwright for end-to-end checks of load speed and correctness. Claude Code Max, combined with consultants experience from smaller-scale projects, sped up development considerably. The final model runs in a CPU-only Ollama container on Cloudflare to keep costs low.

INGKA / IKEA

Senior Software Engineer

Jan 2023 - May 2026

Worked within 3D as a Service at INGKA, maintaining and optimizing 3D models used across IKEA.com.

Key responsibility was Rotera, a lightweight 3D viewer used on product and landing pages. It supported multiple formats, including modal experiences with product information and interactive features such as "complete the look" (upsell), dimension visualization, and AR for in-home product placement.

Also contributed to an embeddable 3D component used as an alternative to static images, including hover interactions and applications on interactive in-store screens.

GitHub, Cloudflare, Three.js, Preact, React.js, GCP, Playwright, Zustand, TypeScript

Inter IKEA

Senior Software Engineer

Apr 2017 - Nov 2022

Worked in a front-end platform team building a shared component library used across multiple applications.

Initiated the move toward reusable components by addressing duplicated implementations, with a key focus on standardizing the price component to improve consistency and accuracy.

Contributed to the development and maintenance of the platform, helping enable faster delivery of new applications (as little as three months).

Later supported the evolution to a more flexible architecture using lightweight components and modern web standards (e.g., web components, lit-html), allowing greater control for consuming teams.

Collaborated closely with multiple teams and acted as a point of contact for integrations and communication tools.

Node.js, LESS, Webpack, GruntJs, Web Components, VS Code, Styled-components, React.js, Babylon.js, Vite

Axis Communications - Fixed Dome

Senior Software Engineer

Dec 2015 - Mar 2017

Working with maintaining the old web in the beginning and do future development of the web that became ACA (Axis Camera Assistance).

The work involved prototyping, designing, planing, coding and maintaining web interfaces for various functionality needed on Axis products. Mostly cameras but not always, sometimes prototypes that needed something to further the development or production of the units.

HTML5, Node.js, SASS, CSS3, JetBrains WebStorm, Gulp.js, Makefiles, Yocto, ES6

Axis Communications - Encoders/Decoders

Senior Developer

Apr 2014 - Dec 2015

The assignment involves development of UX-prototypes and front-end solutions. The focus on new technologies is high in this assignment, but it's also important to be able to understand and maintain the existing legacy code.

HTML, JavaScript, Linux, CSS, Responsive design

IKEA

Senior Software Engineer

Sept 2013 - Mar 2014

Worked with implementing the new web project (NWP) frontend for IKEA. This involved creating UX prototypes of how the site should be implemented and helping the developers to integrate the web with the backend. The main

goal of the new web was that it should be responsive and be able to work with almost any device that was web capable. From cellphone to computers with big screens and the tablets in between.

Had a part time role as defect manager that handled all incoming defects, so that the where assigned to correct person and fixed in time.

JavaScript, JSP, Spring, CSS, jQuery, SASS, WebLogic, Maven, RTC, Foundation, Bourbon Neat

Ericsson

Senior Developer

Apr 2012 - Jul 2013

Designed and implemented new web interfaces for ERDM and improved current implemented interface. Helped implement a new connector for DLMS, for added metering monitoring support.

GlassFish, JavaScript, JSP, Spring, JUnit, CSS, jQuery, JSON, Selenium, jQuery UI, Maven, FindBugs, Sonar, DLMS, Java EE

Ericsson

Software Engineer

Mar 2011 - Apr 2012

Implementing designed solutions into Provisioning Gateway for added capabilities.

GlassFish, LDAP, Spring, JUnit, Eclipse, Maven, LOTC, Java EE, SoapUI

Telenor Norway

Configuration Manager

Jan 2011 - Dec 2011

Migrated the existing code base from ClearCase to a new version system called Jazz Team Server.

Oracle 10g, IBM Rational ClearCase, IBM Rational Team Concert, ClearCase LT, Jazz Team Server

Telenor

Software Engineer

Jan 2010 - Dec 2010

Implementing designed solutions and design new solutions to further improve of the current java applications of FLOW and Spider.

JBoss Operations Network, Struts, JUnit, Eclipse, Ant, Tomcat, Oracle 10g, TIBCO InConcert, iLog, Java EE

Nilson Group

Senior Developer

Jan 2010 - Dec 2010

Setup an test server with OTRS:ITSM, for evaluating if it could replace Nilson Groups current helpdesk system. Minor upgrades where done to the pearl scripts so that it worked well in their environment. They needed an ITIL approved environment that could replace their current costly old system.

Apache, Oracle MySQL, ITIL, Eclipse, Perl, Oracle 10g, PostgreSQL

Cybercom/Knowit Hosting

Software Engineer

Jan 2010 - Dec 2010

Nilex integration written in php, which integrates OpenNMS and Nagios with Nilex. So all tickets handling on notifications are automatically sent and with the possibility to send sms notifications and alert calls for major events.

Apache, Oracle MySQL, SOAP, Eclipse, PHP, PHPUnit, PostgreSQL, SoapUI

Telenor Norway

Software Engineer

Jan 2009 - Dec 2009

Replaced old web GUI with TIBCO General Interface (GI) for a BAM application used with the FLOW system for ADSL fulfillment process. This included design of interface and implementation in java.

Oracle MySQL, Hibernate, Spring, JUnit, Eclipse, Java, Ant, Tomcat, Axis, Stripes, SoapUI

Telenor Norway

Software Engineer

Jan 2009 - Dec 2009

Migrating an old TIBCO solution to a new java spring based solution called Nexus, that was based on open source instead of TIBCO Inconcert.

Spring, JUnit, Eclipse, Java, Ant, Tomcat, JMS, TIBCO InConcert

Sony Ericsson

Software Engineer

Jan 2009 - Dec 2009

Implement a new user interface for PlayNow that should be easier accessed, more optimized and user friendly. The development work focused on optimizing JavaScript. This was done for Sony Ericsson Front End Team.

HTML, JavaScript, JSP, CSS, Tomcat, Maven

Saplo

Software Engineer

Jan 2009 - Dec 2009

Designed the Saplo widget used on Sydsvenskan to view tags that Saplo generated and helped implementing the widget.

HTML, JavaScript, CSS

Telenor Norway

Software Engineer

Jan 2009 - Dec 2009

Designed and implemented java web services with IBM WebSphere for communication used between Spider and Flow in Telenor Metro environment.

JUnit, Maven, IBM Rational Application Developer, WebSphere, Java EE, SoapUI

Telenor Norway

Software Engineer

Jan 2008 - Dec 2008

Implementing and designing java solutions for Spider.

JBoss Operations Network, Struts, JUnit, Eclipse, Ant, Tomcat, Oracle 10g, TIBCO InConcert, iLog, Java EE

Telenor Norway

Configuration Manager

Jan 2008 - Dec 2008

Migrated from an old ClearCase environment to a new ClearCase LT.

IBM Rational ClearCase, ClearCase LT
