

## Pezhman Kasraee

### / Senior Software Engineer

Pezhman is a senior software engineer with an advanced academic background and a long industry career. He focuses on knowledge sharing, clear communication, and structured engineering practices. Working and studying in multicultural environments has strengthened his communication and leadership skills. He also enjoys combining academic discipline with practical industry work to support sustainable, reliable, secure, and modern software development.

He has more than twenty years of experience building backend systems using Java, Python, and Go. He has worked in both enterprise and smaller organizations across telecom, IoT, and finance where clear requirements and high-quality output are essential. He also expands his skills in modern AI and works with tools like LangChain, Ollama, and agentic microservices. Cybersecurity is a steady part of his work, including threat modeling and secure development, and he has experience in regulated environments shaped by GDPR, FATCA, and OECD rules.

## / Highlighted assignments

### Senior Software Engineer

Handelsbanken

Oct 2025 - April 2026

Pezhman developed and maintained three backend services for Handelsbanken's UK and Netherlands markets using Java, Spring Boot, SOAP, and Kafka. His responsibilities included development, deployment, and contributing to architectural decisions across distributed teams. He prioritized cybersecurity, reliability, and code quality through automated testing and CI/CD, with services deployed on Red Hat OpenShift.

### Senior Software Engineer

Swedish Tax Agency

Jul 2021 - Mar 2025

Pezhman designed, developed, and maintained microservices using Java, Spring Boot, and ActiveMQ, managing Oracle and H2 databases with Liquibase. His responsibilities included deployment on Red Hat OpenShift, mentoring, and contributing to architectural decisions. He prioritized cybersecurity and code quality through automated testing and CI/CD, working with regulatory requirements including FATCA, OECD, and GDPR and collaborating with organisations in the EU and US.

### Techniques

REST API  
Microservices  
Java Development  
H2  
MySQL  
Oracle  
MongoDB  
Spring Boot  
Spring Framework  
Java  
Python  
Go

### Tools

Eclipse  
IntelliJ  
Visual Studio Code

### Products/Platform

MongoDB  
MySQL  
Oracle  
H2  
Linux (RedHat, Debian, Ubuntu, Kali)  
RedHat Openshift  
Azure  
Active MQ

## / Relevant projects and assignments

### Handelsbanken

Senior Software Engineer

Oct 2025 – April 2026

Pezhman worked as a Senior Software Engineer at Handelsbanken, developing and maintaining three backend services for private and business customers in the UK and private customers in the Netherlands. The services used Java, Spring Boot, legacy SOAP, and Kafka for synchronous and asynchronous communication. His responsibilities included deployment on Red Hat OpenShift, mentoring developers, and contributing to architectural decisions. He implemented unit, integration, and system tests, supported BFF services for Android and iOS applications, and maintained a strong focus on cybersecurity and code quality. He collaborated with distributed teams in Sweden, the UK, and the Netherlands within a SAFe-influenced organisation using Scrum and Jira.

Java, Spring Boot, SOAP, Kafka, JUnit, SpringBootTest, WireMock, Maven, Jenkins, JFrog, SonarQube, Git, Bitbucket, Red Hat OpenShift, Linux Ubuntu VDI, Confluence, MS Teams, RocketChat, FIGMA, SAFe, Scrum, Jira, CI/CD, Backend Developer

### Swedish Tax Agency

Senior Software Engineer

Jul 2021 - Mar 2025

Pezhman worked as a Senior Software Engineer at Skatteverket, designing, developing, maintaining, and deploying microservices using Java, Spring Boot, and ActiveMQ for synchronous and asynchronous communication. He maintained Oracle and H2 databases with Liquibase, configured Jenkins pipelines, and managed JFrog repositories and SonarQube quality gates. His responsibilities included configuring and monitoring on-premise Red Hat OpenShift environments, mentoring developers, and contributing to architectural decisions. He maintained a strong focus on cybersecurity and automated testing while working with FATCA, DAC1, DAC4, OECD, and GDPR requirements. He collaborated with distributed teams and external organisations in the EU and US within a SAFe-based organisation using Scrum and Jira.

Java, Spring Boot, ActiveMQ, Oracle, H2, Liquibase, JUnit, SpringBootTest, Maven, Jenkins, JFrog, SonarQube, Git, GitHub, Red Hat OpenShift, Red Hat Linux, Windows + Linux emulator, Confluence, Skype, RocketChat, OWASP, SAFe, Scrum, Jira, CI/CD, Microservices, Backend Developer

### CompareIT

Senior Software Engineer

Jan 2019 - Jun 2021

Pezhman worked as a Senior Software Engineer at CompareIT, developing, maintaining, and deploying gateway applications for smart-home solutions on embedded Linux. He supported the transition from Ant to Maven and used shell scripting to automate updates, testing routines, and security tasks. He maintained H2 and MySQL databases and occasionally developed server applications in Go. The system used WebSocket for communication between servers and gateways and Zigbee for sensors and devices, with Linux infrastructure hosted on DigitalOcean Droplets. He worked closely with the CTO and product owner on architectural decisions, product adaptation, and customer needs within an agile organisation using Kanban and Trello.

Java, Maven, Ant, Go, H2, MySQL, Shell scripting, Embedded Linux, Linux servers, Git, GitHub, DigitalOcean Droplets, WebSocket, Zigbee, Slack, Confluence, Kanban, Trello

### Ericsson

Senior Software Engineer

Jan 2017 - Dec 2018

Pezhman worked as a Senior Software Engineer at Ericsson, developing and maintaining backend components within the Charging project using Java and Java EE on Red Hat Linux. He used Maven for builds, Git and GitHub for version control, and Gerrit for code reviews, with Jenkins supporting CI/CD and automated testing. He used OpenGrok for source-code searches and Mingle for task tracking. Working within a Scrum organisation, he collaborated with distributed teams in Sweden and Chennai, India, contributing to knowledge sharing, code reviews, and architectural discussions.

Java, Java EE, Maven, Git, GitHub, Gerrit, Jenkins, JUnit, OpenGrok, Mingle, Red Hat Linux, Scrum, CI/CD

### Tanvir Rayaneh

Software Developer

Jan 1999 - Dec 2010

Pezhman worked as a Software Developer at Tanvir Rayaneh, supporting both ISP operations and software development across internal and customer-facing systems. He developed user account management, booking, tourist package management, insurance, reporting, and web applications. His responsibilities included database design, backend logic, frontend development, and configuring web servers and firewalls. He performed system analysis and modelling using SSADM and RationalRose within a V-model waterfall lifecycle. Working in a small team, he handled multiple roles independently and collaborated across departments throughout the development lifecycle.

C, C++, Java, Delphi, JSP, Python, Shell scripting, PHP, C#.NET, ASP.NET, MySQL, SQL Server, Paradox, Linux, Windows, SSADM, RationalRose, V-model, Waterfall

## Farbar Consulting Engineering

System Developer

Sept 2012 - Jan 2014

Pezhman worked as a Software Developer at Farbar Consulting Engineering, maintaining and improving internal systems for accounting, warehouse, and machinery management across airport, road, and port construction projects. He fixed bugs, automated bug-report workflows, and developed business-critical systems using legacy database technologies. His responsibilities included backend logic, data modelling, and system improvements within a structured waterfall process using SSADM and RationalRose. Working in a small team, he handled multiple roles independently and collaborated closely with operational departments.

dBase, FoxPro, Delphi, Paradox, Windows, Linux, SSADM, RationalRose, Waterfall

## / Past employments

**ICT Additude AB**

Mar 2025 - Ongoing

**Swedish Tax Agency**

Jul 2021 - Feb 2025

**Softhouse Öresund AB**

Jan 2019 - Jun 2021

**Sigma Technology Systems AB**

Jan 2017 - Dec 2018

## / Education

**MSc in Software Engineering**

2010 - 2016

Blekinge Tekniska Högskola

**BSc in Software Engineering**

2002 - 2006

Azad University

**Associate Degree in Computer Application**

1999 - 2001

Azad University

## / Courses & Certifications

**PCAP™ – Certified Associate Python Programmer**

2026

**PCEP™ – Certified Entry-Level Python Programmer**

2025

**Microsoft Certified: Azure Fundamentals**

2025

**IT Security: Foundation: Core Concepts**

2024

**Heart of Agile**

2022

**Scrum Product Owner (Certified Scrum Owner)**

2020

**MongoDB Basics (M001)**

2020

**Java (Oracle Certified Associate)**

2019
