

Muqaddas Muqaddas

/ Senior Software Engineer

Muqaddas is a Senior Software Engineer with strong skills in Java, Kotlin and Spring Boot, complemented by Python. Her experience spans backend development, microservices, REST APIs, cloud-native applications and event-driven architecture, supported by GCP, AWS, Kubernetes, Docker, Terraform and CI/CD. She also has experience in test automation, frontend development and production support. Analytical and collaborative, she focuses on reliable, maintainable solutions and continuous learning.

/ Highlighted assignments

Senior Consultant / Software Engineer

Curamet AB – Client: IKEA

Apr 2023 – May 2026

Muqaddas developed and maintained backend services and REST APIs for four Kotlin-based IKEA applications using Kotlin, Java and Spring Boot. Her work also included React frontend development, legacy C++ maintenance and Python test automation. She contributed to cloud-native solutions, distributed systems and event-driven integrations with Solace PubSub+ and Google Cloud Pub/Sub, alongside production and on-call support, monitoring, troubleshooting and disaster recovery.

Test Automation Engineer / Software Engineer

ResCom Building & Construction

Jul 2021 – Mar 2023

Muqaddas developed and maintained Java and Python test automation for web applications, covering UI, API, integration and regression testing. She created test cases, maintained automation frameworks and worked with developers to investigate defects. She also supported software delivery through CI/CD and cloud-based workflows using AWS, Jenkins and Docker.

Software Engineer / Lead Developer

Codes Cage

Mar 2018 – Jun 2021

Muqaddas developed and maintained database-driven web applications and e-commerce solutions using Java, Python, JavaScript and MySQL. Her work spanned backend, frontend and database development, Java and Selenium test automation, debugging and troubleshooting. She also contributed to machine-learning and data-analysis projects involving data preprocessing, predictive modelling and classification.

Techniques

Java Development
Kotlin Development
Python Development
C++ Development
REST API
Microservices
Spring Boot
Event-Driven Architecture
Test Automation
React Development
TypeScript Development
CI/CD
Distributed Systems

Tools

Solace PubSub+
Google Cloud Pub/Sub
Terraform
Docker
Kubernetes
Helm
GitHub Actions
Jenkins
Selenium
Cucumber
Postman
Grafana
OpenTelemetry

Products/Platform

Google Cloud Platform (GCP)
AWS
PostgreSQL
MySQL

/ Relevant projects and assignments

Curamet AB - Client: IKEA

Senior Consultant / Software Engineer

Apr 2023 – May 2026

Muqaddas developed and maintained backend services and REST APIs for four Kotlin-based enterprise applications at IKEA using Kotlin, Java and Spring Boot. Her responsibilities included API integrations, troubleshooting and maintenance of existing services.

She developed frontend functionality using React and TypeScript and maintained legacy C++ backend components. She also maintained Python test automation and regression tests, adding new test cases as needed.

She worked on event-driven integrations using Solace PubSub+ and Google Cloud Pub/Sub, and on cloud infrastructure using GCP, Terraform, Docker, Kubernetes and Helm. Her responsibilities also included CI/CD pipelines and production and on-call support, using Grafana and OpenTelemetry for monitoring, troubleshooting, incident investigation and root-cause analysis. She contributed to disaster recovery planning, validation and execution.

Kotlin Development, Java Development, Python Development, C++ Development, Spring Boot, REST API, Microservices, Event-Driven Architecture, React Development, TypeScript Development, Test Automation, Regression Testing, API Testing, Integration Testing, Production Support, Incident Investigation, Root Cause Analysis, Disaster Recovery, AI-Assisted Development, GitHub Copilot, Solace PubSub+, Google Cloud Pub/Sub, GCP, Terraform, Docker, Kubernetes, Helm, GitHub Actions, Jenkins, Grafana, OpenTelemetry, Git, Jira, Miro, PostgreSQL

ResCom Building & Construction PTY LTD

Test Automation Engineer / Software Engineer

Jul 2021 – Mar 2023

Muqaddas designed and maintained Selenium test automation using Python and Java for web applications. She developed automated UI, API, integration, functional and regression tests.

She created test cases, maintained test suites and performed manual testing, working with developers to investigate defects and verify fixes. She also supported CI/CD and cloud-based development workflows using AWS, Jenkins and Docker.

Java Development, Python Development, Selenium, Test Automation, UI Testing, API Testing, Integration Testing, Functional Testing, Regression Testing, Cucumber, BDD, AWS, Jenkins, Docker, Postman, Git, Jira, Confluence, Agile Scrum

Codes Cage

Software Engineer / Lead Developer

Mar 2018 – Jun 2021

Muqaddas developed and maintained database-driven web applications and e-commerce solutions using Java, Python, JavaScript, PHP, HTML, CSS and MySQL. Her work covered backend, frontend and database functionality.

She contributed to debugging, troubleshooting and Java and Selenium test automation. She worked on integrating backend services and databases, gathering and refining technical requirements, developing new functionality and maintaining software documentation. She also collaborated on machine-learning and data-analysis projects involving data preprocessing, predictive modelling, classification and model evaluation.

Java Development, Python Development, JavaScript, PHP, HTML, CSS, Web Development, Backend Development, Database Development, MySQL, Selenium, Test Automation, Machine Learning, Predictive Modelling, Data Processing, Software Maintenance

Superior University

Information Technology Manager

Nov 2016 – Feb 2018

Muqaddas managed the IT department, overseeing infrastructure, technical operations and troubleshooting. Her responsibilities included analysing, designing, installing and maintaining networks, computers and other IT equipment. She held technical meetings to review issues and identify solutions. She also delivered lectures in Programming Fundamentals, Software Engineering and Database Systems and supervised final-year student software projects.

IT Management, Technical Leadership, Infrastructure Management, Network Administration, Troubleshooting, Software Engineering, Programming, Database Systems, Project Supervision, Mentoring, DHCP, DNS, IIS, FTP, Active Directory, Network Configuration

/ Past employments
