

Nicklas Shamlo

/ Senior Software Engineer

Senior Software Engineer with professional experience since 2007, combining broad technical depth and architectural insight across backend and client platforms. Comfortable with modern stacks including Java, TypeScript/Node.js, Swift and cloud/datastore technologies, he adapts quickly to new systems and tools and integrates seamlessly into existing projects. Organized, flexible and reliable, he consistently produces maintainable, high-quality solutions on schedule and contributes to system design and technical direction.

/ Highlighted assignments

Senior Software Engineer

Yale - Assa abloy

Mar 2024 - Aug 2025

Senior Software Engineer on Yale's residential locks platform. Improved platform and microservices (Node.js/TypeScript) running on Kubernetes in AWS, and led the migration to a new MQTT-based protocol for backend-to-lock communication.

Senior Software Engineer

IKEA - Kitchen Planner

Jan 2020 - Jan 2024

Contributed as part of a large team building IKEA's new kitchen planner web app. Worked full-stack with JavaScript/TypeScript, focusing on back-end. Major responsibility was developing a processing platform using AWS Lambda and EventBridge to construct and compile IKEA articles into region-specific products for the planner front-end to assemble and sell kitchens.

Ericsson

Senior Software Engineer

Sept 2026 - Ongoing

Niklas is a part of a team at Ericsson in Karlskrona working on the development of new features for "Ericsson Dynamic Activation" a system for configuring subscription information of mobile users. Niklas is in this project a xx developer.

iOS, Git, Swift, Swift UI

Yale - Assa abloy

Senior Software Engineer

Mar 2024 - Aug 2025

Niklas was the senior software engineer at Yale's residential locks platform.

Worked to improve the platform, microservices running on node (typescript mostly) in kubernetes on AWS. But also lead the work of moving to using a new MQTT based protocol for the interaction between the back-end and the locks.

Databases, JavaScript, Amazon Web Services, MongoDB, TypeScript, Backend Development, MQTT (IoT), Backend Development with TypeScript and Node.js

Knowit

Senior Software Engineer

Jan 2024 - Mar 2024

In-house project creating a iOS (SwiftUI) application for the KEX platform.

Created a store-front application, using Optimizely as back-end, for demonstration of how customer apps could look when using the KEX platform.

iOS, Swift, SwiftUI

IKEA - Kitchen Planner

Senior Software Engineer

Jan 2020 - Jan 2024

Was part of a large team that developed the new kitchen planner for the IKEA webpage.

Doing both back-end and front-end work in javascript and typescript. But focusing on back-end parts.

A large part of the project was to develop a processing platform, using AWS Lambda and EventBridge, for constructing and compiling the all the IKEA articles into region specific products that could be used in the kitchen planner front-end to build and put together and sell kitchens.

JavaScript, Git, Amazon Web Services, Node.js, GitHub, Bitbucket, TypeScript, JIRA

Sony Mobile

Architect/Developer

Jan 2014 - Dec 2019

Developed the Sketch application for iOS

This included both the drawing part and the social network part of the service.

iOS, Git, OpenGL, GitHub, Swift

Sony Ericsson

Architect/Developer

Jan 2013 - Dec 2019

Developed, Sketch, a comprehensive feature-full drawing and photo manipulation application.

Which later added it's own social network, cloud sync, and chat. The network grew to more than 10 million active users.

The server back-end was implemented in Java. It was split over three service clusters. The sync part, the social network interaction part, and the chat service. The two first parts were normal REST back-ends, but the chat service used smaller instances and message passing between them to keep up with the web-sockets from all the clients.

SQL, Java, Git, Amazon Web Services, HTTP, Android, WebSockets, JIRA, Kotlin, Android Studio, JetBrains, DynmaoDB

Sony Ericsson

Developer/Architect

Jan 2012 - Dec 2012

Developed Android applications, and server back-ends, for social network integration in smart phones.

For example, sharing and backing up photos to Facebook, Google and Flickr. Integration of what you and your friends are listening to in the music player.

The server parts were done in Java on AWS, which both interacted with the phones and the different third-party services.

Eclipse, Java, Git, Amazon Web Services, HTTP, Android, WebSockets

Sony Ericsson

Developer/Architect

Jan 2008 - Dec 2012

Mainly developed Android applications for contact handling, e.g. the phone book.

Eclipse, Java, Git, Android, IBM Rational ClearQuest

Sony Ericsson

Developer

Jan 2006 - Dec 2007

Feature phone development, among other things were part of developing the instant messaging part of the phones.

Perl, IBM Rational ClearQuest, ClearCase, C++ programming

Siemens Laser Analytics AB

Developer

Aug 2006 - Aug 2007

The master thesis work consisted of developing a graphical tool for configuring parts of their laser measurement devices.

C#, C++ programming

Partnertech AB

Developer

Jan 2003 - Dec 2003

Developed a statistics tool for X-ray machines the their surface-mounting production line

Databases, SQL, C++ programming
