

Oskar Wingård

/ Solution architect

Seasoned solution architect and software engineer with several years designing, implementing and managing cloud-native solutions on Azure and AWS. Combines strong technical expertise with exceptional analytical thinking, problem-solving, clear communication and team leadership to translate business needs into reliable, scalable architectures and deliverables.

/ Highlighted assignments

Solution architect

Inter IKEA Marketing and Communications

Aug 2025 - Ongoing

Technically responsible for two product teams building pipelines and tools for creating and maintaining 3D models and associated data. The first product acts as central hub for 3D models, metadata, storage and related workflows. The second product is a managed compute service for 3D workloads for example rendering and conversion.

Solution architect

Inter IKEA Systems Service AB

Apr 2019 - Jul 2025

Provided solution design and architecture support for a global kitchen-planner range management system. The system processed 3D models and product data to deliver consistent, globally available product information for end customers and internal users. Managed a catalog of ~15,000 products distributed to 60 regions worldwide requiring high availability and uptime.

/ Highlighted education

Information and communication technology

Chalmers University of Technology

2003 - 2023

Science

Lerums gymnasium

1997 - 2000

Roles

Solution Architect
Team lead

Methods & Processes

System Architecture
Continuous Integration
Agile Methods
Continuous Delivery

Platforms

Microsoft Azure
Amazon Web Services
ChatGPT
GitHub

Techniques

Infrastructure as Code
AWS IAM
Identity and Access Management (IAM)
React.js

Products

AWS CloudFormation
AWS Lambda
Amazon S3
